

RO-ECONOMY

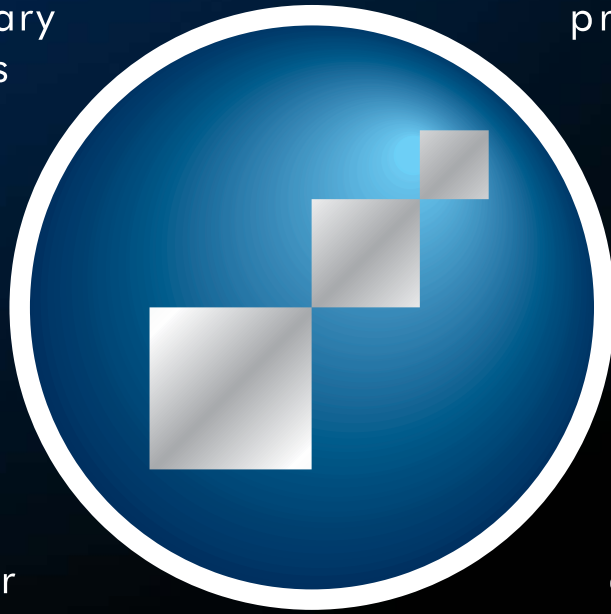

Sleek, Thin, Simple yet so efficient

Crobal Water
water filtration company

Introduction

Crobal Water is a Latvian based company through the world. Our main goal is to produce high-quality, revolutionary Reverse Osmosis products based on purification method. Our products use the newest technologies which provide perfect brand positioning and advantage for each of our partners in local and worldwide European and market. Our devices are simple in use, designed to be attractive by design, what makes them a perfect companion for any office space. Working with us always pays off double, for you and your client.

company with partnerships goal is to produce high-products based on purification method. newest technologies perfect brand competitive each of our European and market. Our designed to be attractive by design makes them a any office space. pays off double, for you

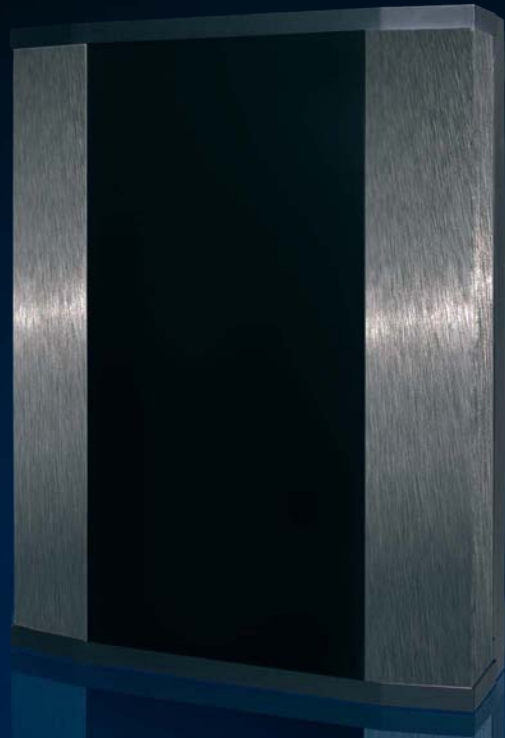

RO-ECONOMY

RO-ECONOMY is primarily oriented for household usage, this device was invented to replace the classic, traditional series device.

Modifications of this device are endless. Starting from outside look, a plexiglass sheet which can be made in virtually any color imaginable, ending on placing your logo on it.

From technological aspect, this device comes with separate tank sizing from 2.2G metal stainless steel tank, ending on 4.0G plastic tank. Device uses new type of Push-In filters what shortens the time for replacing the filters.

Finally, from end user perspective, this is a classic traditional device with all modification traditional device lacks. Replacing the filters is so easy truly your clients can make it themselves. No electronics make it a perfect boxed device, simple for use, thin, and extremely flexible. Finding a perfect spot in kitchen for Reverse Osmosis device is no longer a problem. You can turn it horizontally, vertically, lay it on the floor, screw it on the wall or put it under kitchen (if there is enough space). Its all up to you and your client.
